Experience

Software Development Engineer

Zillow

July 2015 - Present

Coordinated with creative, content and marketing to create custom WordPress themes to drive traffic.

Full Stack Developer

DPS Inc.

Aug 2013 - July 2015

Responsible for designing, developing and maintaining WordPress sites for the company. Developed an internal news kiosk using Raspberry Pi and WordPress. Started building a Ruby on Rails application to manage all of the company's business processes from lead tracking to accounting.

Full Stack Developer

seedcms

May 2014 - Present

Custom Shopify theme and application development utilizing the Shopify API, Ruby on Rails, JSON and jQuery to create advanced functionality.

Owner

Hey Jones!

Apr 2007 - Present

This was an interesting period... more or less scrambled around providing web development, network administration, graphic design, whatever I could find to do and get paid for.

Technology Manager

Avanti Environmental, Inc.

Apr 2012 - Aug 2013

Built a custom web application in ASP.NET and SQL to manage business processes; project management, billing, payroll, reporting, etc. Developed Windows Mobile applications to allow for on-site data logging. Created a customer portal that allowed limited access to client data.

Backline Technician

Thrice

Sep 2005 - May 2008

Man, was this fun. Set up, packed up and maintained instruments and backline. Travelled the world with some of my best friends. Saw a lot of really great places, but also spent a lot of time in dumpy venues.

Senior Web Developer

D-Link Systems, Inc.

Nov 2001 - Aug 2005

Founding member of the Web Development department. Developed the first Technical Support site where content was managed directly by the Technical Support department. Developed an RMA site to coordinate product returns between customers, the RMA department and the warehouse. Developed an internal Sales Pipeline application to streamline collaboration between the Sales and Marketing departments.
